Opus 27 no 2 - Advanced

This arrangement was taken from the International Library of Piano Music so it is the original advanced version of this passionate Chopin nocturne. Because of the complexity of this nocturne the lesson spans 4 CD's giving the student easily four hours of detailed instruction on how to play this piece. A full demonstration of the nocturne is provided followed by a detailed "by ear" lesson in two to four measure increments. Learning this piece has never been easier than this.

# Nocturne in Bbm Op 9 No 1 (Chopin) Early Advanced

[Song Sample Nocturne in Bbm](#)

[Lesson Sample Nocturne in Bbm](#)

From Three Nocturnes. This is the original composition (not an arrangement) of Chopin's Nocturne in Bbm. This particular Nocturne seems to be the beginning of a trend in Chopin's composing with the left hand keeping a consistent arpeggio pattern while the right hand seems to wander off unconcerned about the time signature. This creates a lot of 3 against 2 and 10 against 3 patterns between the left and right hands. These patterns are pointed out and discussed in detail during this lesson as they are encountered.

The song is demonstrated fully and then taught completely "by ear" describing every note and finger used to play the song.

[Lesson Sample - Prelude Cm](#)

Piano Solo - Late Beginner

This is a lesson on a late beginner arrangement of Chopin's "Prelude in Cm." The original is an Intermediate level difficulty but this arrangement allows you to play the song much sooner. Also, because this song is in the same key, almost all of what you learn in it will be used when you learn the original, more difficult, version. The song is demonstrated completely and then taught totally "by ear" in two to four measure increments.

[Lesson Sample - Waltz in Am](#)

Chopin - Late Beginner/ Early Intermediate

This is original arrangement of this Chopin piece and it is taught completely "by ear." I rate this one as a late beginner and early intermediate because the first section is suitable for most first year students. It is only as the piece progresses that it becomes more difficult. Like always, the lesson has a full demonstration of the song followed by a detailed all-audio lesson breaking down the entire song measure-by-measure and note-by-note.
